SELECTED PATENTS & PUBLICATIONS

30+ patents and publications as primary inventor/collaborator, spanning AI, NLP, knowledge graphs, data privacy, IoT, and semantic systems. Select patents donated to the Linux Foundation.

BAST AI

Five patent filings covering the core ontology engine, including two issued patents.

SELECTED IBM-ERA PATENTS

Ontology-driven Feature Engineering in Statistical Predictions
Hyperplane Optimization in High Dimensional Ontology
Generative Learning Paths for Autonomous Upskilling
Representation of Distributional Similarity in Semantic Graphs
Violation and Exception Life Cycle Management via Blockchain
Method to Identify and Prevent Privacy Violations in Consumer Devices

EDUCATION & CREDENTIALS

MA Anthropology — University of Denver (1998)

BA Classical Archaeology (Greek and Latin) — Florida State University (1996)

IBM APPOINTMENTS

Distinguished Engineer — IBM (appointed 2016)

Senior Technical Staff Member (STSM) — IBM (appointed 2012)

IBM Master Inventor (2019)

PROFESSIONAL CERTIFICATIONS

Distinguished Data Scientist — Professional Certification, The Open Group (2024)

Renewal of a profession Beth created and got accredited through The Open Group in 2018

L3 Thought Leader Certified Data Scientist, The Open Group (2018, recertified 2022)

BOOKS

AI for the Rest of Us (co-author) — Nominated #1 book to read in 2024 by Constellation Research

Julian Steward and the Great Basin (co-author and editor)
